BINAM NEPAL

FULL STACK DEVELOPER

Kathmandu, Nepal ✉ binamnepal173@gmail.com 🌐 portfolio-lac-two-fnzxmp4fce.vercel.app

PROFESSIONAL SUMMARY

Motivated Information Technology student and Full-Stack Web Developer with practical experience in constructing robust web applications, building RESTful APIs, and implementing AI-driven automation systems. Highly proficient in React.js, Python, Django, PostgreSQL, and modern front-end tooling. Skilled in designing multi-role user platform flows, integrating third-party payment systems (eSewa API), and setting up scalable cloud backend infrastructure. Possesses strong analytical skills gained through auditing combined with effective technical communication skills from tutoring, eager to contribute to high-impact development projects.

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), Python, HTML5, CSS3, C, Java

Frameworks & Libraries: React.js, Vite, Django, Flask, REST APIs

Databases & Cloud: PostgreSQL (Neon), Vercel Hosting, Supabase

Tools & Ecosystem: Git, GitHub, VS Code, eSewa Payment Gateway Integration, LLM APIs (Groq / OpenAI-compatible)

Networking Concepts: TCP/IP, Computer Networking, Cisco Networking Fundamentals

FEATURED TECHNICAL PROJECTS

AI Lead-Qualification Bot for Study-Abroad Consultancy — LogicPixel

- Architected a WhatsApp-first AI automated assistant engineered in **Django** with a cloud-hosted **Neon PostgreSQL** database.
- Configured flexible provider routing supporting **Groq and OpenAI-compatible LLM APIs** for high-throughput responses.
- Designed an automated lead pipeline stage model (New Enquiry → Info Collected → Follow-up Needed → Staff Assistance Required → Consultation Ready → Closed).
- Built background task triggers for automatic 12-hour follow-up messages and human-handover logic sending staff notification emails when inquiries require manual intervention.
- Tuned bot prompt engineering to dynamically recognize and reply in the student's language and script (English or Nepali).

YOYO – Daily Wage Workers Hiring Platform

- Developed a full-stack marketplace web application connecting clients with daily wage workers using a decoupled **React + Vite** frontend and **Django** REST API backend.
- Implemented custom role-based authorization providing tailored user flows, navigation menus, and functional dashboards for both clients and workers.
- Integrated local payment processing via the **eSewa API** allowing seamless transactions in Nepalese Rupees (NPR).
- Engineered user profile modules supporting verified profile photos, contact management, and trust verification badges.

Anime Streaming Web Application

- Created an anime browsing and streaming application using the **AniList API** for rich metadata query and external video playback APIs.
- Managed persistent backend data storage with a cloud-hosted **Neon PostgreSQL** database instance.
- Optimized frontend request caching and request timing to handle free-tier API cold-start latency and connection sleeping effectively.

Personal Developer Portfolio

- Designed, built, and continuously deployed a modern personal developer portfolio site hosted on Vercel.
- Implemented dynamic internationalization features allowing instant multi-language switching (including English, Nepali, and German).

PROFESSIONAL EXPERIENCE

Personal Developer Portfolio — Live Link

- Designed, built, and deployed a modern personal developer portfolio site hosted on Vercel (https://portfolio-lac-two-fnzxmp4fce.vercel.app/).
- Implemented dynamic internationalization features allowing instant multi-language switching (including English, Nepali, and German).

Auditor — Sgc Consultancy

Jan 2024 – Mar 2025

- Evaluated company compliance with internal control procedures through meticulous examination of operational records and financial documentation.
- Conducted formal audits, authored comprehensive analytical reports, and communicated findings and strategic recommendations to leadership.
- Identified cost discrepancies and alerted management to disallowed expenditure items, sharpening attention to detail.

EDUCATION

Bachelor of Information and Communication Technology

2025 – Present (Exp. 2028)

Texas College of Management and IT

- Core focus areas: Software Engineering, Web Development, Object-Oriented Programming, and Computer Networking.

High School Diploma — Bagmati College

2023 – 2025

Focus on Basic Computer Science Knowledge and technical fundamentals.

CERTIFICATIONS & TRAINING

- **CCNA: Introduction to Networks** — Cisco Networking Academy (Completed June 2025)
- **CCNA: Switching, Routing, and Wireless Essentials** — Cisco Networking Academy (Completed June 2025)
- **React JS Full Stack Course** — Hands-on Application Development (Completed 2026)
- **Django Template & Backend Course** — Web Framework & API Architecture (Completed 2026)

LANGUAGES

- **English:** Professional Working Proficiency
- **Nepali:** Native / Full Professional Proficiency
- **Hindi:** Fluent Communication
